

## Wilton

### Olmstead Hill Road to Wolfpit Road

#### Trail Highlights

The northern end of the trail begins at Allen's Meadows, where there are 2 multi-purpose playing fields and community gardens. The trail then runs adjacent to Wilton High School and the athletic complex. It continues along a woodland trail to Merwin Meadows, which has a swimming pond and bathhouse, picnic area, playground, and soccer field. Beyond Merwin Meadows, a wooden bridge for pedestrian and bike traffic brings the trail to the town center. Pedestrians can follow sidewalks along River Road through the town center. Just south of the town center there is access to Schenck's Island, a park with walking trails that follow the Norwalk River's banks. Just south of Schenck's Island, the 82-acre Bradley Park can also be accessed from River Road on its west side. Cyclists can bypass these parks and continue south down River Road, to where the trail ends at the north end of Horseshoe Park, which connects to Wolfpit Road.

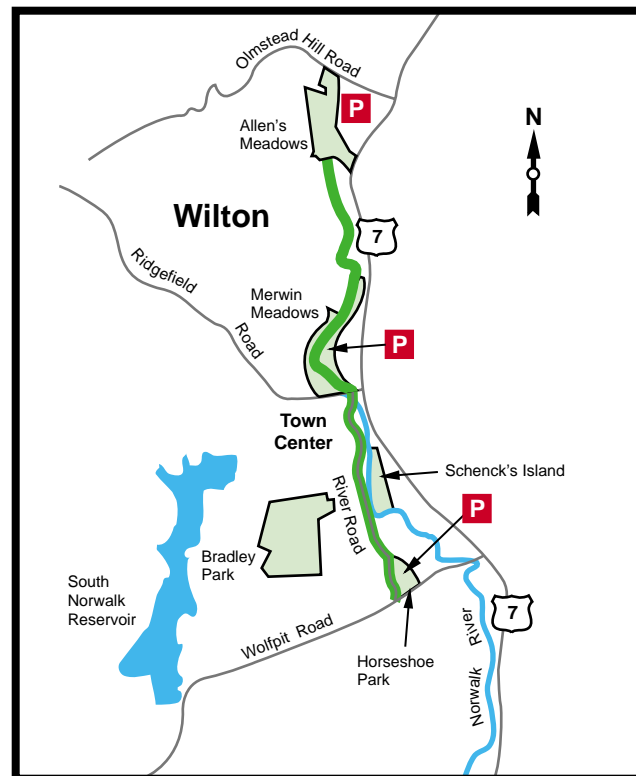

#### Parking and Accessibility

There is parking at the northern section at both Allen's Meadow and Merwin Meadows. Allen's Meadows parking is off of Route 7 (Danbury Road) and Merwin Meadows is off of Ridgfield Road.

Parking for the southern section is available at Horseshoe Park.
